TRAINING ACTIVITY

During my relatively short academic career, I have supervised the final degree project of a biology student at University of Jaén (year 2021). I have also supervised three master students (two ongoing projects with students from Pablo de Olavide University and one from the University of Jaén (year 2019). I have also had the opportunity to co-supervise a PhD student (year 2020-ongoing), and have pro-actively been engaged in mentoring other students with which I have collaborative papers. In addition, I have been a lecturer for several years (~70 hours in total) in four different subjects at University of Jaén, for Biology and Environmental Science students.
